# REVIEW

# 2017 ADVERTISING RATE CARD

## MARKET AUTHORITY

Australian Bulk Handling Review has an enviable reputation as the authority on Australian bulk handling in industries like mining, stock piling, grain, grain storage, ore processing, quarrying, ship loading and port facilities, power generation, food, milling, fertiliser, sugar, plastics, etc. It is worth considering that readers of ABHR are interested only in bulk handling issues. Therefore there is no wasted readership as with other broad scope publications.

## ENGINEERING STRENGTH

One of our strengths is the significant number of consulting engineers who read, submit technical articles and advertise their 'design and build' services in the magazine.

These 'design and install' engineers also use Australian Bulk Handling Review and the Bulk Handling Equipment Guide as a source of information on the latest and most appropriate plant, equipment and services to recommend for their clients' projects.

A strong, regular presence in ABHR can only contribute to building and consolidating your share of this highly competitive market segment.

## EDITORIAL CREDIBILITY

Adding to our strength and market credibility is the support we receive from the ABHR Editorial Panel whose five learned members provide editorial guidance not available to other non-bulk handling publications.

## INDUSTRY FORUM

The magazine is an important forum not only for advertising but also for news of the technology associated with the bulk handling industry. Advertisers enjoy an added bonus of being welcome to submit product news or application stories whenever they are available.

## LONGEVITY OF MEDIA INVESTMENT

Having just six bimonthly editions per annum means that ABHR provides at least double the life of advertising when compared with monthly magazines.

A further bonus arises from the habit of our loyal readers who maintain a library of back copies that are used as reference when sourcing products and technology for their bulk handling industry projects.

## CIRCULATION BY INDUSTRY

## CIRCULATION BY STATE

%	STATE	COPIES
35%	NEW SOUTH WALES/ACT	1,755

## NO EXPENSIVE WASTE!

The bulk handling market spans many industries. Only Australian Bulk Handling Review reaches them all! Previously you needed several magazines to reach the total market. Even then you paid for some readers with little interest in bulk handling. Our magazine is a lot more cost efficient. It isolates only those people with genuine bulk handling interest. Published every second month, ABHR reaches over 6,000 engineers who plan, design or manage bulk-handling systems in 28 industries. Our circulation stretches from plant to boardroom. Everyone in the buying process, whether a mechanical engineer, consultant or CEO, falls within the readership profile. They decide which equipment is purchased and which is passed over. And you can reach them through ABHR.

# PRINT ADVERTISEMENT DIMENSIONS

<b>FULL PAGE</b>	Image Area: 270 x 190 Trimmed to: 297 x 210 Bleed: 307 x 220

Note: All specifications are in millimetres, height by width. For more information, please ask for our detailed specification sheet

## PRINT ADVERTISEMENT MATERIAL REQUIREMENTS

**FILE DELIVERY** DropBox, YouSendit and Email (up to 8Mb only) or YouSendit.com. An FTP upload service also available – contact Patrick Roberts for details.

**PREFERRED FILE FORMATS** Adobe PRESS QUALITY PDFs or 300dpi JPEG. Please prepare all PDFs using the Press Quality setting in InDesign or Quark software packages. Before PDF creation, all colours are to be converted to CMYK and all fonts converted to outlines.

**OTHER ACCEPTABLE FILE FORMATS** InDesign, Photoshop, Illustrator, QuarkXpress. Please ensure all fonts and images are sent with the file in a separate "Links" folder and all images are CMYK. Spot colours are not accepted. ILLUSTRATOR FILES MUST HAVE ALL FONTS CONVERTED TO OUTLINES/PATHS. We do not accept CorelDraw, Microsoft Word, Powerpoint, Publisher, or any other Microsoft generated files.

**COLOURS** Please ensure that all spot and Pantone colours are converted to CMYK before creating press quality PDFs or before finalising raw files. Ensure that all black text is set to 100% black only rather than set in CMYK with values for each.

**IMAGES** Should be a minimum of 240dpi, 300dpi preferred at 100% scaling in CMYK mode. Vector (line art) images should be a minimum of 1200dpi, also in CMYK. Image file formats should be jpeg, tiff, ai or composite eps and should not be compressed. ICC profiles are NOT accepted and are not to be saved with images. Ensure Profiles are unchecked when saving images in Photoshop. No responsibility will be accepted for image quality if images are supplied with resolutions differing from those specified in this document.

**FONTS** We accept both Postscript and TrueType fonts. When packaging or collecting files for output, include printer and screen fonts. PDF files should have all fonts embedded. Fonts should not be stylised. Wherever possible, convert fonts to outlines/curves.

**BLEED** If bleed is required, please ensure 5mm bleed is applied all round and that required text and images are wholly within the Image Areas specified. Crop marks for bleed ads only should be offset at 3mm.

**PROOFS** A colour proof should be supplied with all ads. We will not accept responsibility for the printed result if a proof has not been supplied.

**CONTACT** For questions or additional information: patrick.roberts@informa.com.au or telephone +61 2 9080 4015 or 0450 928 798.
